

Manual Contents

Volume 1

- Part 1:** Introduction to QHDM and Guidance
- Part 2:** Planning
- Part 3:** Roadway Design Elements
- Part 4:** Intersections and Roundabouts
- Part 5:** Qatar Roadway Design Criteria
- Part 6:** Design for Priority Intersections
- Part 7:** Design for Roundabouts
- Part 8:** Design for Signalized Intersections
- Part 9:** Interchanges and Freeway or Motorway Corridors
- Part 10:** Drainage

Volume 2

- Part 11:** Utilities
- Part 12:** Pavement Design
- Part 13:** Structures Interfaces
- Part 14:** Earthworks
- Part 15:** Ground Investigation and Aspects of Geotechnical Design Guide
- Part 16:** Geotechnical Risk Management
- Part 17:** Intelligent Transportation Systems
- Part 18:** Street Lighting
- Part 19:** Pedestrian, Bike, and Public Transportation
- Part 20:** Context Sensitive Design

Volume 3

- Part 21:** Environmental
- Part 22:** Landscape and Planting Design
- Part 23:** Design and Operation of Road Safety
- Part 24:** Road Safety Audits
- Part 25:** Departures from Standards

Volume 1

Part 1: Introduction to QHDM and Guidance

Acronyms and Abbreviations	iii
1 Introduction.....	1
1.1 Purpose and Intent of the Manual	1
1.2 Scope and Jurisdiction of the Manual	2
1.3 Intended Audience	2
1.4 Road Design and Collaboration	2
1.5 Organization of this Manual	4
1.6 Integration with Other Publications	4
2 Guidance.....	7
2.1 Introduction	7
2.2 Sustainability.....	7
2.3 Sustainability Concepts and Definitions	8
2.3.1 Hima: Ancient Sustainable Best Practice in Qatar	8
2.3.2 Sustainability in Qatar Today	8
2.3.3 International Best Practice in Qatar—Key Considerations	9
2.4 Safety in Design	10
2.4.1 Human Factors in Roadway Design.....	11
2.4.2 Road Safety Audits	12
2.5 Design for Maintenance	12
2.5.1 Maintenance Organizations	13
2.6 Context Sensitive Design and Context Sensitive Solutions.....	13
2.6.1 Problem Definition	13
2.6.2 Policy, Strategy, and Plan Context	14
2.6.3 Development of the Design Vision and Objectives.....	14
2.6.4 A Collaborative Multi-Disciplinary Approach	14
2.6.5 Working with Stakeholders.....	14
2.6.6 Community Engagement.....	15
2.6.7 Understanding the Urban and Landscape Context.....	15
2.6.8 The Importance of Incorporating Landscaping into Qatar Urban Streets .	15
References	17

Part 2: Planning

Acronyms and Abbreviations	vii
1 Highway Strategy.....	1
1.1 Introduction	1
1.2 Vision, Goals, and Objectives.....	1
1.3 Project Types and Scope	3
1.4 Transportation Planning Process in Qatar	4
1.5 Land Use Considerations.....	5
1.5.1 Land Acquisition	5
1.6 Appraisal	7
2 Projects Involving New Roads	9
2.1 Planning and Design Objectives: Provide Mobility and Accessibility.....	9
2.2 Planning Development Access for New Roads	9
2.3 Project Development Process.....	9
2.3.1 Development Process for New Road Projects.....	10
2.3.2 Project Development Process: Design and Build (D&B).....	12
3 Project Development Process for Interchange Design Studies (Existing Reconstruction or New)	15
3.1 Step 1: Establish Data Collection Requirements and Obtain Data	15
3.1.1 Develop Interchange Planning and Design Framework	16
3.1.2 Assemble and Charter Stakeholders	16
3.1.3 Develop Project Planning and Design Criteria.....	17
3.2 Step 2: Confirm Study Approach, Evaluation Criteria, and Decision Process.....	17
3.2.1 Determine Evaluation Criteria and Technical Approach	17
3.2.2 Develop Design Year Traffic and Select Most Likely Alternatives	18
3.3 Step 3: Conduct Interchange Type Studies.....	18
3.3.1 Concept Engineering Design.....	18
3.3.2 Stakeholder Review and Screening	19
3.4 Step 4: Functional Geometric Design of Screened Alternatives.....	19
3.5 Step 5: Select Preferred Alternative, Document and Develop Final Engineering Plans.....	20
4 Projects Involving Existing Roads.....	21
4.1 Unique Characteristics of Projects Involving Existing Roads	22
4.2 Design of Reconstruction Projects.....	22
4.2.1 Relationship of Safety Performance to Design Elements.....	23
4.2.2 Risk Management Guidelines.....	25
4.2.3 Reconstruction Design Approach	26
4.3 Designation of Eligibility for 3R Treatment.....	27
4.4 Design of 3R Projects	28
4.4.1 Context Sensitive Safety Enhancements for 3R Projects	29

4.4.2	3R Safety Enhancements for Rural Highways	29
4.4.3	3R Safety Enhancements for Urban Roads	32
5	Functional Classification as a Primary Design Control	33
5.1	Qatar Road Classification.....	33
5.2	Definition of Urban and Rural Roads.....	34
5.3	Functional Classification in Urban Areas	34
5.3.1	Expressways	35
5.3.2	Arterials	35
5.3.3	Collector-Distributor Roads.....	36
5.3.4	Collector Roads	36
5.3.5	Local	38
5.4	Functional Classification in Rural Areas.....	38
5.5	Special Corridors.....	39
5.6	Temporary Roads.....	40
5.7	Application of Functional Classification in Design	40
5.7.1	Key Parameters	40
5.7.2	Network Connections.....	46
5.7.3	Transport Provisions for Non-car Users	50
6	Design Vehicles	53
6.1	Introduction.....	53
6.2	Vehicle Weights and Dimensions	53
6.2.1	Abnormal Loads and High Load Routes	53
6.3	Typical Design Vehicles.....	54
6.3.1	Definitions and Principles.....	54
6.3.2	Design Vehicles.....	54
6.3.3	Swept Path Analysis	55
7	Driver Performance and Human Factors.....	57
7.1	Introduction	57
7.2	Qatar Driver Characteristics	57
7.3	The Task of Driving	58
7.4	Vehicle Guidance	59
7.4.1	Road Following.....	59
7.4.2	Car Following.....	59
7.4.3	Passing Maneuvers.....	59
7.4.4	Gap Acceptance, Merging, and Other Guidance Activities.....	59
7.5	Information System	59
7.5.1	Traffic Control Devices	60
7.5.2	Road Environment.....	60
7.6	Information Handling.....	60
7.6.1	Reaction Time.....	60
7.6.2	Primacy.....	60

7.6.3	Expectancy.....	61
7.7	Driver Error	62
7.8	Speed and Design.....	63
7.9	Design Assessment	65
8	Traffic Characteristics.....	67
8.1	Introduction	67
8.2	Traffic Volume.....	67
8.2.1	Annual Average Daily Traffic.....	67
8.2.2	Design Hour Traffic.....	67
8.3	Highway Capacity Concepts.....	69
8.3.1	Capacity Definition.....	69
8.3.2	General Characteristics and Application	70
8.3.3	Level of Service	71
8.3.4	Traffic Operations Analysis.....	72
8.3.5	Level of Service as a Design Control	72
8.3.6	Influence of Design Features on Capacity	73
9	Access Control and Access Management	75
9.1	General Conditions	75
9.2	Access Management.....	76
9.2.1	Basic Principles of Access Management.....	76
9.2.2	Access Classifications.....	77
9.2.3	Methods of Controlling Access.....	77
9.2.4	Access Management and Safety Performance.....	78
10	Speed and Design	79
10.1	Introduction	79
10.2	Operating Speed	79
10.3	Speed Variations	79
10.4	Design Speed.....	80
10.5	Posted Speed	80
11	Facilities for Pedestrians	81
11.1	General Considerations.....	81
11.2	Designing for Pedestrians	81
11.3	Pedestrian Capacity and Pedestrian Facilities	81
12	Facilities for Cyclists.....	85
13	Parking.....	87
	References.....	89

Part 3: Roadway Design Elements

Acronyms and Abbreviations	xi
1 Introduction.....	1
1.1 Design Speed	1
1.1.1 Posted Speed.....	2
1.2 Design Speed Related Parameters	3
1.2.1 Changeover of Design Speed	3
1.2.2 Reconstruction and Connection to Existing Roads	4
1.2.3 Departures from Standards.....	4
1.2.4 Special Considerations	7
1.3 Sustainability.....	7
2 Sight Distance	11
2.1 Basic Types of Sight Distance.....	11
2.2 Stopping Sight Distance	12
2.2.1 SSD Model and Parameters.....	12
2.2.2 Stopping Sight Distance Design Values	12
2.2.3 Horizontal Restrictions to Stopping Sight Distance.....	14
2.2.4 Vertical Restrictions to Stopping Sight Distance	16
2.3 Passing Sight Distance	17
2.4 Decision Sight Distance.....	19
2.5 Intersection Sight Distance	21
2.5.1 Case A: Intersections with No Control	22
2.5.2 Case B: Intersections with Stop Control on Minor Road.....	24
2.5.3 Case C: Intersections with Yield Control on Minor Road	28
2.5.4 Case D: Intersections with Traffic Signal Control	31
2.5.5 Case E: Intersections with All-Way Stop Control	32
2.5.6 Case F: Left Turns from Major Road.....	32
2.6 Special Considerations.....	33
2.7 Departures	34
3 Horizontal Alignment	35
3.1 Simple Horizontal Curve and Spirals.....	35
3.2 Alignment combinations using simple curves and tangents	36
3.3 General Design Considerations.....	39
3.3.1 Maximum Centerline Deflection without a Horizontal Curve.....	39
3.3.2 Minimum Curve Lengths	40
3.4 Cross Slope and Superelevation	40
3.5 Superelevation Transition and Spirals	42
3.5.1 Axis of Rotation	43
3.5.2 Rate of Rotation	43
3.5.3 Calculation of Superelevation Transition Lengths	46

3.5.4	Spirals	48
3.5.5	Positioning of Superelevation Transition	49
3.5.6	Superelevation on Compound Curves.....	51
3.5.7	Superelevation on Reverse Curves.....	52
3.5.8	Shoulder Slopes on Superelevated Roadways	53
3.6	Travelled Way Widening on Horizontal Curves	57
3.7	Horizontal Clearance or Lateral Offset	60
3.8	Special Considerations	61
4	Vertical Alignment	63
4.1	Terrain.....	64
4.2	Longitudinal Grades	64
4.2.1	Maximum Longitudinal Grades	64
4.2.2	Minimum Grades	64
4.2.3	Minor Road Grades at Intersections	64
4.3	Vertical Curves	65
4.3.1	Crest Vertical Curves	65
4.3.2	Sag Vertical Curves	65
4.3.3	Crest Vertical Curve Design	67
4.3.4	Sag Vertical Curve Design	69
4.3.5	Minimum Length of Vertical Curves.....	72
4.3.6	Maximum Grade Change without a Vertical Curve.....	72
4.4	Vertical Clearances.....	73
4.5	Special Considerations	76
5	General Considerations.....	79
5.1	General.....	79
5.2	Harmonizing the Horizontal Alignment	80
5.3	Harmonizing the Vertical Alignment.....	81
5.4	Phasing of Horizontal and Vertical Alignments	82
5.5	Alignment Coordination in Design	83
6	Cross Section Elements	89
6.1	General Considerations.....	89
6.1.1	Introduction.....	89
6.1.2	Design Principles.....	90
6.1.3	Road Network Objectives	91
6.1.4	Departures.....	93
6.2	Design Requirements.....	93
6.2.1	Travel Lanes	94
6.2.2	Shoulders.....	95
6.2.3	Hard Strips	97
6.2.4	Auxiliary Lanes	97
6.2.5	Medians	98

6.2.6	Service Roads	101
6.2.7	Frontage Roads	102
6.2.8	Parking Bays and Lanes	103
6.2.9	Parallel Roadside Parking	105
6.2.10	Angled Roadside Parking.....	105
6.2.11	Off Street Parking.....	106
6.2.12	Curbs	108
6.2.13	Road Restraint System	112
6.2.14	Side Slopes	112
6.2.15	Clearances	113
6.2.16	Fencing	114
6.2.17	Roadside Elements and Verges	114
6.2.18	Pedestrian Facilities.....	115
6.2.19	Bike Facilities	116
6.2.20	Utilities	116
6.2.21	Right-of-Way	116
6.2.22	Typical Cross Sections	116
7	Integrated Road and Landscape Design	157
7.1	Integrated Road Design Principles.....	158
7.2	Road Siting and Alignment	158
7.2.1	Earthworks	158
7.2.2	Retaining Walls.....	159
7.2.3	Rock Cut	159
7.2.4	Interchanges and Roundabouts	160
7.2.5	Gateways.....	160
7.2.6	Special Areas	161
7.3	Structures	161
7.3.1	Bridges.....	161
7.3.2	Pedestrian Bridges	162
7.3.3	Tunnels	163
7.3.4	Pedestrian Underpasses.....	163
7.4	Fences and Walls	164
7.5	Water Management/ and Conservation	164
7.5.1	Detention Systems	165
7.5.2	Infiltration Systems	165
7.6	Landscape and Utilities.....	166
7.7	Sustainable Landscape Design.....	166
7.7.1	Introduction	166
7.7.2	Urban Street and Landscape Assessment and Planning	167
7.7.3	Soils	167
7.7.4	Water Conservation	168
7.7.5	Plant Species	168
7.7.6	Materials	168

7.7.7	Landscape Maintenance and Management	169
8	Other Elements Affecting Design	171
8.1	Erosion Control	171
8.2	Rest Areas	171
8.2.1	Spacing of Rest Areas	171
8.2.2	Site Selection	171
8.2.3	Rest Area Design.....	172
8.3	Traffic Control Devices.....	178
8.3.1	Signing and Marking	178
8.3.2	Traffic Signals.....	179
8.4	Noise Barriers.....	179
8.4.1	Placement.....	179
8.5	Fencing.....	180
8.6	Sand Abatement in Dune Areas.....	180
	References.....	183

Part 4: Intersections and Roundabouts

Acronyms and Abbreviations	iii
1 Introduction.....	1
1.1 Overview.....	1
1.2 Intersection Type Selection Criteria	1
1.3 Intersection Objectives.....	2
2 Intersection Types and Their Applicability.....	3
2.1 Types Related to Functional Classification	3
2.2 Traffic Flow and Capacity.....	4
3 Intersection Selection.....	7
3.1 Operational Quality	7
3.2 Safety Performance	8
3.3 Spatial Efficiency and Lifecycle Cost	8
3.4 Decision-making in Intersection Type Selection.....	8
3.4.1 Rural Intersections	9
3.4.2 Urban Major Road Intersections.....	9
3.4.3 Urban Local Road Intersections	10
3.5 Route Designation	10
3.6 Traffic Flows and Capacity	10
3.7 Local Conditions.....	10
3.8 Overview of Operational and Design Trade-offs	10
3.9 Designation of Priority Intersections	11
3.9.1 Needs for Traffic Signal-Controlled Intersections	12
3.10 Data and Analysis for Intersections	13
4 Roundabout Type Selection	15
4.1 Route Designation	15
4.2 Traffic Flows and Capacity	15
4.3 Data and Analysis for Roundabouts	16
5 High-volume At-grade Intersection Types	19
5.1 Introduction.....	19
5.2 Indirect Left-turn Intersections	19
5.3 “Superstreet” Intersections.....	21
5.4 Continuous-flow Intersections	21
5.5 Arterial-to-arterial Grade Separations.....	22
References	23

Part 5: Qatar Roadway Design Criteria

Acronyms and Abbreviations	v
1 Urban Roadway Design	1
1.1 Design Criteria for Urban Expressways	2
1.1.1 Network Connections	2
1.1.2 Design Vehicle	2
1.1.3 Decision Sight Distance	4
1.1.4 Cross Slope and Superelevation	4
1.1.5 Lateral Offset and Horizontal Clearance	4
1.1.6 Median Width.....	4
1.1.7 Parking, Sidewalks, and Bike Paths.....	4
1.1.8 Interchanges with Arterials and Rural Freeways.....	5
1.1.9 Collector-Distributor Roads.....	5
1.1.10 Vertical Clearances	5
1.1.11 Right-of-Way Widths	5
1.2 Design Criteria for Arterials, Collector Distributor Roads and Boulevards.....	5
1.2.1 Network Connections	5
1.2.2 Design Vehicle	8
1.2.3 Cross Slope and Superelevation	8
1.2.4 Curbs.....	8
1.2.5 Lateral Offset and Horizontal Clearance	8
1.2.6 Median Width.....	9
1.2.7 On-street Parking	9
1.2.8 Bike Paths	9
1.2.9 Sidewalks	9
1.2.10 Intersection Design.....	9
1.2.11 Service Roads.....	10
1.2.12 Interchanges.....	10
1.2.13 Vertical Clearances	10
1.2.14 Right-of-Way Widths	10
1.3 Design Criteria for Collectors	10
1.3.1 Network Connections	13
1.3.2 Design Vehicle	13
1.3.3 Cross Slope and Superelevation	13
1.3.4 Median Width.....	13
1.3.5 Curbs.....	13
1.3.6 Lateral Offset and Horizontal Clearance	14
1.3.7 On-street Parking	14
1.3.8 Bike Paths	14
1.3.9 Sidewalks	14
1.3.10 Intersection Design.....	15
1.3.11 Vertical Clearances	15

1.3.12	Right-of-Way Widths.....	15
1.4	Design Criteria for Local and Service Roads	15
1.4.1	Network Connections.....	16
1.4.2	Design Vehicle	16
1.4.3	Cross Slope and Superelevation.....	16
1.4.4	Curbs	17
1.4.5	Lateral Offset and Horizontal Clearances.....	17
1.4.6	On-street Parking	17
1.4.7	Bike Paths	17
1.4.8	Sidewalks.....	17
1.4.9	Intersection Design	17
1.4.10	Driveways	18
1.4.11	Cul-de-Sacs and Turnarounds	20
1.4.12	Vertical Clearances.....	20
1.4.13	Right-of-Way Widths.....	20
2	Rural Roadway Design Criteria.....	23
2.1	Design Criteria for Rural Freeways	24
2.1.1	Network Connections.....	24
2.1.2	Design Vehicle	24
2.1.3	Horizontal Alignment and Vertical Profile.....	24
2.1.4	Decision Sight Distance	24
2.1.5	Cross Slope and Superelevation.....	26
2.1.6	Median Width	26
2.1.7	Curbs	26
2.1.8	Roadside Slopes and Clear Zones.....	26
2.1.9	Interchanges.....	27
2.1.10	Vertical Clearances.....	27
2.1.11	Right-of-Way Widths.....	27
2.2	Design Criteria for Rural Arterials.....	27
2.2.1	Network Connections.....	27
2.2.2	Design Vehicle	29
2.2.3	Horizontal Alignment and Vertical Profile.....	29
2.2.4	Decision Sight Distance	29
2.2.5	Passing Sight Distance	29
2.2.6	Cross Slope and Superelevation.....	29
2.2.7	Median Width	29
2.2.8	Curbs	30
2.2.9	Roadside Slopes and Clear Zone	30
2.2.10	Interchanges.....	30
2.2.11	Vertical Clearances.....	30
2.2.12	Intersection Design	30
2.2.13	Right-of-Way Widths.....	31
2.3	Design Criteria for Rural Collectors	31

2.3.1	Network Connections	31
2.3.2	Design Vehicle	31
2.3.3	Horizontal Alignment and Vertical Profile.....	31
2.3.4	Passing Sight Distance	33
2.3.5	Cross Slope and Superelevation	33
2.3.6	Median Width.....	33
2.3.7	Curbs.....	33
2.3.8	Roadside Slopes and Clear Zone.....	34
2.3.9	Vertical Clearances	34
2.3.10	Intersection Design.....	34
2.3.11	Right-of-Way Widths	34
2.4	Design Criteria for Rural Local Roads.....	34
2.4.1	Network Connections.....	34
2.4.2	Design Vehicle	36
2.4.3	Horizontal Alignment and Vertical Profile.....	36
2.4.4	Cross Slope and Superelevation	36
2.4.5	Curbs.....	36
2.4.6	Roadside Slopes and Clear Zone.....	36
2.4.7	Vertical Clearances	36
2.4.8	Intersection Design.....	36
2.4.9	Right-of-Way Widths	36

Part 6: Design for Priority Intersections

Acronyms and Abbreviations	vii
1 General Design Controls	1
1.1 Definition	1
1.2 Application of Priority Intersections to the Qatar Road Network	2
1.3 Basic Types of Priority Intersections.....	2
1.4 Design of Priority Intersections	3
1.5 Priority Intersection Design Procedure	4
1.6 Choice of Simple or Channelized Left-turn Priority Intersection.....	6
2 Priority Intersections for Two-lane Major Collectors and Local Access.....	7
2.1 Two-lane Road Simple T-intersection.....	7
2.2 Channelized Left-turn Lanes for T-intersections on Two-lane Roads.....	8
2.3 Guidelines for Designing Priority T-intersections with Left-turn Lanes.....	9
2.4 Guidelines for the Operational Viability of Priority T-intersections.....	11
2.5 Crossroads (Four-leg) Intersections.....	14
2.5.1 Crossroads on High-speed Rural Roads	14
2.5.2 Crossroads on Lower-speed Urban Roads	15
2.6 Staggered T-intersections.....	15
2.6.1 Design and Operation of Left/Right Stagger	16
2.6.2 Design and Operation of Right/Left Stagger	17
2.6.3 Safety Effects of Staggered T-intersections	17
2.7 Reconstruction of Priority Intersections.....	17
3 Priority Intersections for Multi-lane Arterials and Collector Roads.....	19
3.1 Priority Intersection with Two-lane Minor Road	19
3.2 Priority Intersections between Two Multi-lane Roads.....	20
3.2.1 Minor Road Approach	20
3.2.2 Diverge Approach from Major Road	20
3.3 System Considerations in Multi-lane Priority Intersection Planning and Design	22
3.4 Unsignalized Median U-turns	22
3.5 Accommodating Pedestrians at Multi-lane Priority Intersections	23
4 Design Controls for Priority Intersections	25
4.1 Design Speed	25
4.2 Design Vehicles.....	25
4.3 Design Level of Service	27
4.3.1 Level of Service Definitions for Priority Intersections.....	27
4.3.2 Level of Service Analysis and Intersection Type Selection.....	27
4.4 Locating Priority Intersections.....	28
4.4.1 Major Road Alignment	28
4.4.2 Minor Road Alignment	29
4.4.3 Skewed Crossroads	31

4.4.4	Y-intersections	31
4.5	Vertical Alignment	33
4.6	Spacing of Intersections.....	34
4.7	Visibility.....	34
5	Geometric Design Details for Priority Intersections	39
5.1	Road Widths.....	39
5.2	Corner Radii	39
5.2.1	Simple T-intersection Corner Radii.....	39
5.2.2	Corner Radii for Channelized Right Turns	41
5.3	Auxiliary Lanes	42
5.3.1	Right-turn Diverge Auxiliary Lanes	42
5.3.2	Guidelines for Application of Right-turn Diverge Auxiliary Lanes	43
5.3.3	Merging Auxiliary Lanes	46
5.3.4	Guidelines for Application of merging Auxiliary lanes	47
5.3.5	Through-lane Continuity and Right-turn Lanes	48
5.3.6	Guidelines for Application of Left-turn Auxiliary Lanes.....	48
5.3.7	Channelized Major Road Left-turn lanes.....	48
5.3.8	Components of Auxiliary and Left-turn Lane Lengths.....	50
5.4	Turning Roadways.....	53
5.4.1	Turning Roadway Width	53
5.4.2	Turning Roadway Nose.....	54
5.4.3	Sight Distance through Turning Roadways.....	55
5.5	Islands and Channelization	55
5.5.1	Principles	55
5.5.2	Functions	56
5.5.3	Raised vs. Flush Island Types.....	56
5.5.4	Design of Islands.....	57
5.6	Pedestrians and Cyclists.....	63
5.6.1	Channelization for Pedestrians and Cyclists.....	63
5.7	Pavement Markings	64
5.8	Traffic Control Devices	64
5.9	Intersection Lighting	65
5.10	U-turns	65
5.10.1	Safety at U-Turns	66
5.10.2	U-Turn Elements.....	66
5.11	Alignment of Intersection at Service Road Termination.....	69
5.11.1	Service Road Diverge/Merge	69
5.11.2	Local Grade Separation	72
5.12	Corner Islands	74
5.12.1	Corner Islands at Turning Roadways	74
5.12.2	Corner Island for Direct Entry with No Auxiliary Lane.....	74
5.13	Median Openings.....	75
5.14	Intersection Sight Distance	75

6	Other Design Elements	77
6.1	Driveways and Major Private Entrances.....	77
6.1.1	Location and Classification	77
6.1.2	Visibility at Driveways and Private Entrances	77
6.2	Priority Intersections in Residential Areas.....	77
6.2.1	Typical Configurations.....	77

Part 7: Design for Roundabouts

Acronyms and Abbreviations	v
1 Introduction	1
1.1 Definitions and Principles	1
1.1.1 General	1
1.1.2 Design Principles.....	1
1.1.3 Roundabout Key Dimensions	1
1.2 Roundabout Categories	3
1.2.1 General	3
1.2.2 Mini-roundabouts.....	4
1.2.3 Single-lane Roundabouts.....	5
1.2.4 Two-lane Roundabouts	5
1.2.5 Grade-separated Roundabouts	6
1.2.6 Signalized Roundabouts	7
1.3 Road Space Allocation and Lane Management	8
1.3.1 Public Transport	8
1.3.2 Cyclists	9
2 Operational Analysis.....	11
2.1 Traffic Operation.....	11
2.1.1 Effect of Geometric Elements	11
2.1.2 Definition of Roundabout Capacity	11
2.2 Traffic Data.....	12
2.3 Capacity and Performance Analysis.....	12
2.3.1 Capacity	12
2.3.2 Performance Analysis	12
2.4 Safety Considerations	13
2.4.1 General	13
2.4.2 Curbs.....	15
2.4.3 Two-wheeled Vehicles.....	15
2.4.4 Large Vehicles.....	15
3 Geometric Design	17
3.1 General Considerations.....	17
3.1.1 Design Objectives	17
3.1.2 Location of Roundabouts	17
3.1.3 Design Vehicle	18
3.2 Key Design Elements.....	18
3.2.1 Inscribed Circle Diameter	18
3.2.2 Circulatory Roadway.....	20
3.2.3 Central Island.....	20
3.2.4 Splitter Islands	20

3.2.5	Alignment of Entry Lanes	21
3.2.6	Entry Curb Radius, r	22
3.2.7	Approach Half Width (v).....	23
3.2.8	Entry Width, e	23
3.2.9	Average Effective Flare Length, l'	23
3.2.10	Entry Angle, ϕ	24
3.2.11	Entry Path Radius	26
3.2.12	Exit Width.....	31
3.2.13	Exit Curb Radius.....	31
3.2.14	Right-turn Bypass Lanes	32
3.2.15	Approach Layout at Right-turn Bypass Lanes.....	36
3.2.16	Exit Layout on Right-turn Bypass Lanes	39
3.2.17	Non-physically Separated Right-turn Bypass Lanes	40
3.2.18	Buses and Right-turn Lanes.....	40
3.3	Sight Distance	40
3.3.1	Approach Visibility	40
3.3.2	Visibility at Roundabouts	41
3.3.3	Forward Visibility at Entry	41
3.3.4	Visibility to the Left at Entry.....	42
3.3.5	Circulatory Visibility.....	44
3.3.6	Pedestrian Crossing Visibility	45
3.3.7	Visual Intrusions	46
3.4	Other Aspects of Design	46
3.4.1	Cross Slope and Longitudinal Gradient	46
3.4.2	Curbs	48
3.5	Signing and Marking	50
3.5.1	Signing	50
3.5.2	Road Markings.....	50
3.6	Landscaping Recommendations.....	50
3.7	Lighting Recommendations	51
3.8	Pedestrians and Cyclists	52
3.8.1	Principles for Pedestrian Crossings	52
3.8.2	Pedestrian Crossing Locations and Dimensions.....	52
3.8.3	Provision of Facilities by Roadway Functional Classification	53

Part 8: Design for Signalized Intersections

Acronyms and Abbreviations	v
1 Introduction	1
1.1 General Design Controls	1
1.1.1 Design Principles.....	1
1.1.2 General Design Considerations	2
1.2 Signalized Intersection Design Process	2
1.2.1 Intersection Sizing and Cycle Length	3
1.2.2 Pedestrians	3
1.2.3 Initial Design Efforts	3
1.2.4 Arrangement and Operations	3
1.2.5 Level of Service	5
2 Intersection Types	7
2.1 Intersection Design Plans.....	7
2.1.1 Signalized Crossroads	8
2.1.2 Signalized T-Intersections.....	9
2.1.3 Signalized Staggered Intersections.....	9
2.1.4 Development of Right Turn and Left Turn Deceleration Lanes at Intersections	10
3 Geometric Design	15
3.1 General Controls	15
3.1.1 Considerations.....	15
3.1.2 Design Speed	15
3.2 Intersection Visibility	15
3.2.1 Visibility on Intersection Approach	15
3.2.2 Intersection Intervisibility Zone.....	16
3.3 Geometric Parameters.....	19
3.3.1 Corner Radii	19
3.3.2 Roadway Widths.....	20
3.3.3 Roadway Widths around Corners.....	20
3.3.4 Swept Paths Requirements	20
3.3.5 Simultaneous Left Turns.....	23
3.3.6 U-Turns at Intersections	24
3.3.7. Median U-Turns.....	24
3.4 Lane Configurations	26
3.4.1 Signalized Approach Lanes	26
3.4.2 Storage Lanes	27
3.4.3 Lane Continuity.....	27
3.5 Staggered Intersections	28
3.5.1 Stagger Distances	28

3.5.2	Storage Length	29
3.5.3	Left and Right Staggers.....	30
3.5.4	Right and Left Staggers.....	30
3.6	Turning Lanes and Islands.....	30
3.6.1	Right-Turn Lanes with Separation Island (Exclusive Right-Turn Lanes)	30
3.6.2	Acceleration Merging Lanes at Right-Turn Lanes.....	31
3.6.3	Signal Control on Right-Turn Lanes	33
3.6.4	Left-Turn Lanes.....	33
3.6.5	Channelizing Islands and Pedestrians	35
3.7	Signals	35
3.7.1	Visibility and Positioning	35
3.7.2	Signal Head Arrangement	36
4	Signalized Roundabouts	37
4.1	General	37
4.1.1	Application of Design	37
4.1.2	Pedestrian Crossing Facilities	38
4.1.3	Geometric Design Standards.....	38
4.1.4	Size	39
4.2	Signal Control.....	39
4.2.1	Extent of Signal Control.....	39
4.2.2	Methods of Signal Control	40
4.2.3	Duration of Signal Control.....	41
4.3	Geometric Modifications.....	42
4.3.1	General	42
4.3.2	External Approach Lane on the Outside	42
4.3.3	External Approach Lane on the Inside	43
4.3.4	Internal Approach Lanes	44
5	Other Design Elements	47
5.1	Pedestrians and Cyclists	47
5.1.1	General Considerations.....	47
5.1.2	Specific Measures for Pedestrians	47
5.1.3	Pedestrian Refuges and Separation Islands	48
5.1.4	Use of Tactile Paving	49
5.1.5	Crossing Places	50
5.1.6	Specific Measures for Cyclists	50
5.2	Transit Facilities at Intersections	51

Part 9: Interchanges and Freeway or Motorway Corridors

Acronyms and Abbreviations	vii
1 Qatar Expressway and Freeway System	1
2 Principles of Freeway and Expressway Planning and Design	3
2.1 Background on Principles.....	3
2.2 Maintain Route Continuity.....	3
2.3 Maintain Basic Number of Lanes	4
2.3.1 Establishing Basic Lanes	4
2.3.2 Application of Auxiliary Lanes	5
2.4 Provide Lane Balance	5
2.5 Provide All Movements in All Directions	6
2.6 Provide Appropriate Interchange and Ramp Spacing.....	6
2.7 Select Appropriate Interchange Types.....	8
2.8 Select Appropriate Design Speeds for Ramps.....	8
2.9 Design Right-hand Exits and Entrances Only	9
2.10 Prefer Single-Exit Designs	10
2.11 Provide Decision Sight Distance in Advance of Exits	10
2.12 Avoid Designing Weaving Sections	11
2.13 Develop Designs That Can Be Simply Signed	11
3 General Design Requirements for Interchanges	13
3.1 Elements of Interchanges	13
3.1.1 Mainline.....	13
3.1.2 Ramps	13
3.1.3 Weaving Sections	13
3.1.4 Collector-Distributor Roads.....	14
3.1.5 Service Roads.....	14
3.1.6 Crossroad.....	15
3.2 Capacity and Level of Service for Freeways and Interchanges1	15
3.2.1 Overview of Operations and Level of Service for Freeway and Expressway Elements	16
3.2.2 Guidance for Selection of Level of Service Criteria for Interchange Design.....	16
3.2.3 Improving the Performance of Interchanges	21
3.3 Basic Freeway and Interchange Design Criteria.....	22
3.3.1 Mainline Alignment Design	22
3.3.2 Interchange Types and Functional Classification	24
3.3.3 Design Speeds for Service Interchange Ramps	24
3.3.4 Design Speeds for System Interchange Ramps	26
3.3.5 Design Speeds for Collector-Distributor Roads	26
3.3.6 Vertical Relationship of Crossroad to Expressway or Freeway	26
3.3.7 Vertical Clearance.....	27

4	Interchange Types and their Geometric Design	29
4.1	Considerations in Interchange Type Selection	29
4.2	Service Interchange Types	31
4.2.1	Diamond Forms	32
4.2.2	Other Diamond Forms	39
4.2.3	Diverging Diamond Interchange	39
4.2.4	Partial Cloverleaf Interchanges	40
4.2.5	Full Cloverleaf Interchanges	45
4.2.6	Three-Level Service Interchange Forms	46
4.3	System Interchange Types	48
4.3.1	Three-Leg System Interchanges	49
4.3.2	Four-Leg System Interchanges	52
4.3.3	Special Design Issues for System Interchanges	53
5	Geometric Design Requirements for Interchange Ramps	59
5.1	Elements of Ramps	59
5.1.1	Diverge	59
5.1.2	Ramp Proper	63
5.1.3	Merge	67
5.1.4	Ramp Design for High Volumes and Lane Balance	70
5.2	Ramp Cross Section Dimensions	74
5.2.1	One-Lane Ramps—Typical	74
5.2.2	Two-Lane Ramps—Typical	75
5.2.3	Loop Ramp and Sharp Radius Lane Widths	75
5.3	Crossroad Design Considerations	76
5.3.1	Access Control and Proximate Intersections	76
5.3.2	Entrance Ramp Location and Advance Notice to Drivers	76
5.3.3	Wrong-way Driving Mitigation	77
5.3.4	Pedestrians	78

Part 10: Drainage

Acronyms and Abbreviations	vii
1 Introduction	1
1.1 Overview	1
1.2 Scope	1
1.2.1 Scope of Part 10	1
1.2.2 Responsibilities	1
1.3 Functions of Highway Drainage	2
1.4 Drainage Design Philosophy	2
1.4.1 Minor System	3
1.4.2 Major System	4
1.5 Climatic and Physical Considerations	4
1.5.1 Resilience and Urban Creep	5
1.5.2 Climate Change	6
1.6 Policies and Environmental Controls	6
2 Project Concept Stage	9
2.1 Design Stage 1 Summary	9
2.2 Data Gathering	9
2.3 Catchment Assessment	10
2.3.1 Overview	10
2.3.2 Flood Risk Assessment	11
2.4 Consideration of Geometric Design of Road	14
2.5 Determine Viable Outfalls	15
2.6 Consideration of Treated Sewage Effluent	15
2.7 Identify Pollution Control Requirements	15
2.7.1 Background	15
2.7.2 Scope	16
2.8 Stakeholder Engagement	16
2.9 Option Development and Drainage Strategy	16
3 Preliminary Design Work	19
3.1 Design Stage 2 Summary	19
3.2 Design Criteria	19
3.2.1 Flood Return Periods	19
3.2.2 Acceptable Highway Flood Standards	20
3.2.3 Gully Spacing	21
3.2.4 Pipeline Velocities	24
3.2.5 Pipeline Materials	25
3.3 Hydrological Data	25
3.3.1 Rainfall Characterization	25
3.3.2 Intensity-Duration-Frequency	26

Part 12: Pavement Design

Acronyms and Abbreviations	vi
1 Introduction	1
1.1 Objectives and Basis of Design Procedure.....	2
1.1.1 Analysis of Traffic Data	3
1.1.2 Ground Investigation.....	3
1.1.3 Additional Factors.....	3
1.1.4 Choice of Materials and Thicknesses to Meet the Predicted Traffic Load	4
1.2 Empirical Design Method.....	4
1.3 Mechanistic-Empirical Design Method	4
1.4 Difference between the AASHTO Empirical and Mechanistic-Empirical Design Methods	4
2 Types of Pavement	7
2.1 Flexible	7
2.2 Rigid	7
2.3 Flexible Composite.....	7
2.4 Concrete Block and Modular Paving.....	8
3 Pavement Structure Basics.....	9
3.1 Introduction to Layered System	9
3.2 Structural Layers in Flexible Pavements	9
3.2.1 Wearing Course and Surface Course	9
3.2.2 Intermediate or Binder Course.....	9
3.2.3 Base Course	9
3.2.4 Subbase	10
3.3 Structural Layers in Rigid Pavements.....	10
3.4 Structural Layers in Composite Pavements	10
4 Subgrades.....	13
4.1 General.....	13
4.1.1 Role of Foundation during Construction	13
4.1.2 Role of Base and Subbase in Service	13
4.2 Types of Subgrade.....	14
4.3 Subgrade Strength Determination.....	14
4.3.1 Geotechnical Investigation.....	14
4.3.2 Subgrade Design Using California Bearing Ratio	16
4.4 Parameters and Correlations	17

Part 13: Structures Interfaces

Acronyms and Abbreviations	iii
1 General	1
2 Structure Design and Approval	3
2.1 Qatar Highway Structure Design Manual	3
2.2 Technical Approval of Highways Structures	3
2.3 Structures Requiring Approval in Principle	4
2.4 Submission of Approval in Principle	4
2.5 Departures from Standard	6
3 Structure Interfaces with Highway Design	9
3.1 Headroom to Structures	9
3.2 Highway Configuration on Bridges	9
3.3 Highway Configuration in Tunnels and Underpasses	10
3.4 Special Consideration for Tunnels	10
3.5 Clearance to Obstacles	11
3.6 Parapets	11
3.7 Waterproofing of Bridge Decks	12
3.8 Pavement on Bridges	12
3.9 Lighting, Sign, and Gantry Supports.....	13
4 Maintenance Requirements	15
4.1 Bridge Structures	15
4.1.1 Bearings	16
4.1.2 Expansion Joints	16
4.1.3 Access to Edges and Overhangs	17
4.1.4 Access at Bridge Abutments.....	17
4.1.5 Access within Bridge Decks	17
4.1.6 Drainage of Bridge Decks	18
4.2 Tunnels, Underpass Structures, and Retaining Walls	18
4.2.1 Drainage of Tunnels and Underpass Structures.....	18
4.2.2 Associated Drainage Structures	18
4.2.3 Fire Life Safety Equipment.....	18
5 Pedestrian Crossings	19
5.1 Pedestrian and Bike Bridges	19
5.2 Pedestrian and Bike Underpasses.....	19
6 Animal Crossings.....	21
References	23

Part 14: Earthworks

Acronyms and Abbreviations	iii
1 Introduction.....	1
1.1 Scope	1
1.2 Use of Soil and Rock Terms.....	1
2 Planning of Earthworks	3
2.1 Introduction	3
2.2 Sustainable Practices	3
2.2.1 Materials Stewardship	3
2.2.2 Preservation of Topsoil	3
2.2.3 Use of Nonstandard or Recycled Materials.....	4
2.2.4 Minimization of Erosion	4
2.3 Geotechnical and Geoenvironmental Assessments and Ground Investigation for Earthworks.....	5
2.4 Consideration of Environmental Impacts and Mitigation Measures	6
2.5 Existing Earthworks	7
3 Earthworks Design	9
3.1 Balancing Earthwork Materials Volume	9
3.2 Potential Effects of Sustainable Drainage	10
3.3 Disposal of Surplus Fill	11
3.4 Design of Cuttings.....	11
3.4.1 Modes of Slope Failure.....	11
3.4.2 Cutting Slope Design	11
3.5 Influence of Construction Procedures on Cutting Slope Stability	14
3.5.1 Seismic Effects.....	15
3.6 Design of Embankments and Filled Areas	15
3.6.1 Embankment and Fill Slope Design	15
3.6.2 Seismic Effects.....	16
3.7 Embankments over Weak Ground	16
4 Earthworks Construction	17
4.1 Quality Control of Earthworks Materials.....	17
4.2 Placement of Earthworks Materials	17
4.2.1 Soils	17
4.2.2 Rocks	18
4.3 Slope Inspections.....	18
4.3.1 Soil Slopes.....	18
4.3.2 Rock Slopes.....	19
4.4 Minimizing the Effects of Construction Plant Operations	19
4.5 Blasting	19

5	Information on Specific Materials and Issues	21
5.1	Soils and Bedrock Strata	21
5.2	Seismic Hazard	21
5.3	Geosynthetics	21
5.4	Prevent the Spread of Plant and Animal Diseases	21
6	Highways in Dune Areas.....	23
6.1	Introduction	23
6.2	Dune Formation and Movement	23
6.3	Design and Construction in Dune Areas	23
6.3.1	Highway Location	23
6.3.2	Design Elements	23
6.3.3	Design and Construction Considerations	25
6.3.4	Dune Stabilization.....	27
6.3.5	Dune Destruction	28
	References.....	29

Part 15: Ground Investigation and Aspects of Geotechnical Design Guide

Acronyms and Abbreviations	vi
Nomenclature and Symbols	viii
1 Introduction.....	1
2 Qatar General Geology and Geotechnical Hazards.....	3
2.1 Overview.....	3
2.2 Geology of the Region	3
2.2.1 Solid Geology.....	4
2.2.2 Superficial Geology.....	8
2.3 Characteristics of Qatar Strata	11
2.3.1 Introduction	11
2.3.2 Aeolian Sands	11
2.3.3 Sabkha	12
2.3.4 Marine Sediments	13
2.3.5 Continental Sediments	13
2.3.6 Residual Soils.....	13
2.3.7 Rus Formation Unit 1 (Al Khor Limestone).....	13
2.3.8 Rus Formation Unit 2 (Undifferentiated Carbonate and Sulfate Facies)	14
2.4 Groundwater Problems in Qatar	17
3 Preliminary Sources Study	19
3.1 Overview.....	19
3.2 Scope of Preliminary Sources Study	19
4 Ground Investigation Planning.....	21
4.1 Overview.....	21
4.2 Introduction	21
4.3 Ground Investigations Proposals.....	23
4.3.1 Phasing of Ground Investigation	23
4.3.2 Guidelines for Overall Coverage of Exploratory Hole Spacing and Depth	24
4.3.3 Ground Investigation Requirements with Regard to Contaminated Land	25
4.4 Soils and Rocks Sampling and Testing to Obtain Engineering Parameters for Use in Geotechnical Design.....	31
4.4.1 General	31
4.4.2 Difficulties in Parameter Determination	32
4.4.3 Natural Variability and Variability due to Past Land Use	35
4.4.4 Sampling and Testing Procedures	35

4.4.5	Interpretation	36
4.5	Guidelines for Typically Required Engineering Parameters.....	39
4.6	In Situ Tests for Determining Soils, Groundwater, and Rock Properties and Engineering Parameters.....	39
4.7	Laboratory Tests for Determining Soil, Groundwater, and Rock Properties and Engineering Parameters.....	39
4.7.1	Soils and Groundwater	39
4.7.2	Rock	50
4.8	Monitoring Instrumentation.....	53
5	Ground Investigation Procurement	55
5.1	Overview	55
5.2	Procurement of a Ground Investigation Company.....	55
5.2.1	Quality of Ground Investigation Personnel	56
5.2.2	Laboratory Quality.....	57
5.3	Ground Investigation Company Performance	58
6	Ground Investigation Specification and Bill of Quantities	59
6.1	Specification and Bill of Quantities	59
6.2	Specification of Ground Investigation of Contaminated Land.....	59
7	In Situ Testing and its Interpretation	63
7.1	Overview	63
7.2	Standard Penetration Testing	63
7.2.1	Introduction.....	63
7.2.2	Influence of Different Practices and Equipment on SPT Results.....	64
7.2.3	Corrections Applied to SPT Results	66
7.2.4	Engineering Parameters and Direct Design Methods	67
7.3	Cone Penetration Testing	68
7.3.1	Introduction.....	68
7.3.2	Test Methods.....	70
7.3.3	Factors that Can Affect CPT Results	70
7.3.4	Presentation of Results	71
7.3.5	Soils Characteristics, Engineering Parameters, Direct Design Methods and Other Applications	73
7.4	Dynamic Cone Penetration Testing	74
7.4.1	Introduction.....	74
7.4.2	Description of DCPT Equipment and Operation of Equipment.....	74
7.4.3	DCPT Application	75
7.4.4	DCPT Data Analysis.....	76
7.4.5	Relationship between Penetration Index and Other Geotechnical Parameters	76
7.5	In Situ Density Tests.....	77
7.6	Pressuremeter Tests	77
7.6.1	Introduction.....	77

Part 16: Geotechnical Risk Management

Acronyms and Abbreviations	iv
1 Introduction	1
1.1 Purpose and Scope.....	1
1.2 Application of Geotechnical Certification Procedure	1
2 The Geotechnical Practitioner	3
2.1 Overview	3
2.2 General Role of Geotechnical Practitioners.....	3
2.3 Geotechnical Practitioners Grades	5
3 Management of Geotechnical Risk	7
3.1 Overview	7
3.2 Definitions and Abbreviations	8
3.2.1 Organizations, Roles, and Responsibilities	8
3.2.2 Key Terms	8
3.3 Geotechnical Categories	9
3.4 Geotechnical Certification Key Stages	11
3.5 Geotechnical Certificate	16
4 Key Stage 1: Initial Project Review.....	17
4.1 Overview	17
4.2 Initial Project Review	17
5 Key Stage 2: Geotechnical Assessment	19
5.1 Overview	19
5.2 Key Stage 2 Sub-stage 2A: Preliminary Sources Study.....	19
5.3 Key Stage 2 Sub-stage 2B: Ground Investigation Proposals	20
5.4 Key Stage 2 Sub-stage 2C: Ground Investigation	20
5.5 Key Stage 2 Sub-stage 2D: Geotechnical Interpretative Report	21
6 Key Stage 3: Geotechnical Design	23
6.1 Overview	23
6.2 Geotechnical Design	23
7 Key Stage 4: Geotechnical Observations and Feedback	25
7.1 Overview	25
7.2 Geotechnical Observations and Feedback.....	25

8	Geotechnical Risk Register and Risk Assessment	27
8.1	Overview	27
8.2	Geotechnical Risk Register	27
8.2.1	Introduction	27
8.2.2	Example Project.....	28
8.3	Risk Assessment.....	29
8.4	Further Information and Geotechnical Risk Register Template	31

Part 17: Intelligent Transportation Systems

Acronyms and Abbreviations	v
1 Introduction	1
1.1 Purpose	1
1.2 Definition of Intelligent Transport Systems	1
1.3 Structure	1
2 Traffic Detection and Monitoring Systems	3
2.1 System Purpose.....	3
2.2 Corridor Detection Systems	3
2.3 Point Detection Systems	4
2.3.1 Inductive Loops.....	4
2.3.2 Microwave Radar Detection Systems.....	4
2.3.3 Magnetometer Detection Systems	4
2.3.4 Video Image Vehicle Detection Systems	4
2.4 Select Vehicle Detection	5
2.5 Design Considerations	5
2.5.1 Predesign Planning	5
2.5.2 System Requirements.....	5
2.5.3 Detector Technology Selection	5
2.5.4 Deployment Guidelines	6
2.5.5 Enclosure	6
2.5.6 Power Requirements, Availability, and Conditioning.....	6
2.5.7 Communications.....	6
2.5.8 Environmental	7
3 Closed-Circuit Television Cameras	9
3.1 System Purpose.....	9
3.2 Design Considerations	9
3.2.1 Predesign Planning	9
3.2.2 CCTV Type.....	9
3.2.3 Camera Mount.....	10
3.2.4 Enclosure	10
3.2.5 Power Requirements, Availability, and Conditioning.....	10
3.2.6 Communications.....	10
3.2.7 Environmental	10
3.3 Location Guidelines.....	10
4 Road Weather Information Systems	13
4.1 System Purpose.....	13
4.2 Types of Sensors	13
4.3 Design Considerations	13
4.3.1 Predesign Planning	14

4.3.2	Location and Placement Guidelines	14
4.3.3	Sensor Type and Sensor Mount	14
4.3.4	Enclosure	14

Part 20: Context Sensitive Design

Acronyms and Abbreviations	viii
1 Introduction.....	1
1.1 Qualities and Characteristics of Successful Projects	1
1.2 Importance of Context Sensitive Design to Qatar	2
1.3 Coordination with Other Sections of this Manual	2
2 Critical Success Factors for CSD/CSS	5
2.1 Employ Effective Decision-making	5
2.2 Reflect Community Values	6
2.3 Achieve Environmental Sensitivity	6
2.4 Provide Safe and Feasible Solutions	6
2.5 A Collaborative Multi-Disciplinary Approach	7
2.6 The Project Team	7
2.6 Project Management Plans.....	8
2.7 Standards versus Guidelines.....	8
2.8 Departures from Standards	8
3 Working with Stakeholders	9
3.1 Who Are Stakeholders?	9
3.2 Understanding and Identifying Stakeholders	10
3.3 Principles of Stakeholder Engagement.....	11
3.4 Understanding the Scope and Objectives of Stakeholder Engagement.....	11
3.5 When to Engage Stakeholders.....	12
3.6 Stakeholder Engagement Plan.....	12
3.7 Stakeholder Engagement Techniques	13
3.7.1 Workshops	13
3.7.2 Design Days or Charrettes.....	14
3.7.3 Site Visits or Site Audits.....	14
3.7.4 Case Study Visits.....	14
3.7.5 One-on-One Meetings.....	14
3.7.6 Stakeholder Questionnaires.....	15
3.7.7 Websites.....	15
3.7.8 Visual Presentation Techniques	15
3.8 Community Engagement	15
3.8.1 Introduction	15
3.8.2 What is “Community”?.....	16
3.8.3 Benefits of Community Engagement	16
3.8.4 Principles of Community Engagement.....	17
3.8.5 Understanding the Local Community	17
3.8.6 Defining the Purpose and Objectives of the Consultation.....	17
3.8.7 Identifying the Scope of the Consultation	18

3.8.8	When to Engage	18
3.8.9	Community Engagement Plan	18
3.8.10	Reporting	18
3.8.11	Community Engagement Techniques.....	19
3.9	Policy, Strategy, and Plan Context	20
3.9.1	Introduction.....	20
3.9.2	Integrating Road and Land Use Plans	21
3.10	Develop the Design Vision and Objectives	21
3.10.1	Introduction.....	21
3.11	Understanding the Urban and Landscape Context.....	23
3.11.1	Introduction.....	23
3.11.2	Urban and Landscape Appraisal	23
3.11.3	The Value of a Good Road Landscape and Urban Streets.....	24
3.12	Urban Context Appraisal.....	24
3.12.1	Introduction.....	24
3.12.2	Urban Context Appraisal	24
3.12.3	Character and Local Distinctiveness	25
3.12.4	Land Use Context.....	26
3.12.5	Urban Form, Street Structure, and Layout	26
3.12.6	Public Space and Parks	26
3.12.7	Movement	27
3.12.8	Landscape and Ecology.....	27
3.12.9	Legibility.....	28
3.12.10	Buildings	28
3.12.11	Community Facilities	29
3.12.12	Community Safety	29
3.13	Landscape Character Appraisal.....	29
3.13.1	Introduction.....	29
3.13.2	Landscape Character Assessment Process	30
3.13.3	Describing the Existing Landscape Character.....	31
3.14	Local Landscape Character Appraisal	33
3.14.1	Identify the Road Function and its Interaction with the Landscape	33
3.14.2	Undertake the Impact Assessment	33
3.14.3	Develop Mitigation Measures	34
3.14.4	Visual Effects	34
3.15	Context Sensitive Solutions.....	35
3.15.1	Introduction.....	35
3.15.2	Project Stages	35
3.15.3	Context Sensitive Solutions	35
4	Urban Roads.....	37
4.1	Introduction	37
4.2	Approach.....	37
4.3	Comprehensive Urban Road Design	37

4.4	Objectives for Urban Roads	38
4.4.1	General	38
4.4.2	Safety.....	39
4.4.3	Land Use Context	41
4.4.4	Character	41
4.4.5	Link and Place.....	42
4.4.6	Efficient Movement.....	43
4.4.7	Sustainability	44
4.4.8	Walking, Cycling, and Public Health	45

Volume 3

Part 21: Environmental

Acronyms and Abbreviations	iv
1 Introduction.....	1
1.1 Background.....	1
1.2 Purpose and Timing	1
1.3 Sustainability.....	3
1.3.1 Concepts and Definitions	3
1.3.2 Sustainability in Qatar Today	3
1.3.3 Sustainability in the Qatar Highways Design Manual	4
1.3.4 International Best Practice in Qatar—Key Considerations	4
1.3.5 Sustainability in Design—Key Generic Themes Applicable	5
1.4 Structure of Environmental Guidelines in QHDM	7
2 Environmental Legislation – Policy, Permitting, and Process	9
2.1 Objectives	9
2.2 Significance	9
2.3 Legislation	9
2.3.1 National Legislation.....	10
2.3.2 International Conventions.....	11
2.4 Guidance	13
2.4.1 Qatar’s Environmental Permitting Procedure.....	13
2.4.2 Demonstrate Integration of Environmental Mitigation Measures	17
2.4.3 Design and Discipline Integration	17
2.4.4 Procurement of Construction Contractors.....	17
3 Environmental Management	19
3.1 Objective.....	19
3.2 Significance	19
3.3 Legislation	19
3.4 Guidance	19
3.4.1 Principles	20
3.4.2 Required	21
3.4.3 Recommended	22
3.4.4 Further Reading.....	24
4 Archaeology and Cultural Heritage.....	25
4.1 Objective.....	25
4.2 Significance	25

4.3	Legislation	25
4.4	Guidance	26
4.4.1	Principles	26
4.4.2	Required	26
4.4.3	Recommended	27
4.4.4	Further Reading	28
5	Ecology and Biodiversity	29
5.1	Objective	29
5.2	Significance	29
5.3	Legislation	30
5.4	Guidance	30
5.4.1	Principles	30
5.4.2	Required	30
5.4.3	Recommended	32
5.4.4	Further Reading	34
6	Water Quality and Conservation	35
6.1	Objective	35
6.2	Significance	35
6.2.1	Water Quality	35
6.2.2	Water Conservation	36
6.3	Legislation	37
6.4	Guidance – Water Quality	38
6.4.1	Principles	38
6.4.2	Required	38
6.4.3	Recommended	40
6.4.4	Further Reading	41
6.5	Guidance – Water Conservation	41
6.5.1	Principles	41
6.5.2	Required	41
6.5.3	Recommended	42
6.5.4	Further Reading	43
7	Air Quality	45
7.1	Objective	45
7.2	Significance	45
7.3	Legislation	46
7.4	Guidance	46
7.4.1	Principles	46
7.4.2	Required	47
7.4.3	Recommended	48
8	Acoustics, Noise, and Vibration	49
8.1	Objective	49

8.2	Significance	49
8.3	Legislation	49
8.4	Guidance	50
8.4.1	Principles	50
8.4.2	Required	50
8.4.3	Recommended	52
8.4.4	Further Reading.....	53
9	Erosion Control and Contaminated Land	55
9.1	Objective	55
9.2	Significance	55
9.3	Legislation	55
9.4	Guidance	56
9.4.1	Principles	56
9.4.2	Required	56
9.4.3	Recommended	58
9.4.4	Further Reading.....	60
10	Materials and Waste Management	61
10.1	Objective	61
10.2	Significance	61
10.2.1	Material Resources.....	62
10.2.2	Waste	63
10.3	Legislation	63
10.4	Guidance	64
10.4.1	Principles	64
10.4.2	Required	65
10.4.3	Recommended	67
10.4.4	Further Reading.....	68
	References	75

Part 22: Landscape and Planting Design

Acronyms and Abbreviations	iii
1 Introduction	5
1.1 What Is Landscaping?	5
1.2 Landscaping in the Highway Environment.....	6
1.3 Existing Landscape Assessment	6
1.4 Roadside Landscape Design	6
1.5 General Criteria for Selection of Trees and Plants.....	7
1.5.1 Tree Boxes and Planting Requirements	7
1.5.2 Tree Sizes	9
1.5.3 Tree Lawn	10
1.5.4 Medians	11
1.5.5 Planting Street Trees	11
1.6 Guidelines on Tree Location	11
1.6.1 Turf Grasses	12
1.6.2 Ground Covers	12
1.6.3 Ground Cover Plants.....	13
1.6.4 Borders	13
1.7 Plant Species and Water Requirements	13
1.8 Irrigation Systems	13
1.9 Bed Preparation for Landscaping.....	13
1.10 General.....	14
1.11 Landscape and Road Safety Considerations	14
1.12 Sight Distance.....	15
2 General Landscape Design Guidelines.....	17
2.1 Landscape Design Objectives.....	17
2.2 Management and Maintenance	18
2.3 Making Space for Landscape	18
2.4 Highway Conditions	19
2.5 Plants.....	22
2.6 Planting Design Themes.....	26
2.7 Planting Functions.....	30
2.8 Landscaping Plans	31
2.9 Maintenance of Landscaped Areas.....	32
3 Irrigation	35
3.1 Strategy	35
3.2 Water Availability.....	35
3.3 Management and Maintenance	35
References	37

Part 23: Design and Operation of Road Safety

Acronyms and Abbreviations	vi
1 Road Safety Principles	1
1.1 Basic Principles	1
1.1.1 Safe System	1
1.1.2 A Shared Responsibility.....	3
1.1.3 Results-Focused Approach	3
1.1.4 Data-Driven Analysis	4
1.2 Using Data to Inform Road Safety Policy and Safety Countermeasures Implementation	5
1.3 Crash Data.....	7
1.4 Road Safety Engineering Management Tools.....	9
2 Speed	19
2.1 Introduction.....	19
2.1.1 Safe System Approach.....	19
2.1.2 Road Characteristics.....	22
2.1.3 Design Characteristics	24
2.1.4 Design Speed	25
2.1.5 Actual Speeds (Operating or Travel Speed)	25
2.1.6 Self-Explanatory Roads.....	25
2.1.7 Posted Speed Acceptance	25
2.1.8 Road Hierarchy.....	27
3 Setting Posted Speeds	33
3.1 General	33
3.1.1 Roles and Organizational Responsibility	34
3.1.2 Speed Limit Working Group	34
3.1.3 Overseeing Organization.....	34
3.1.4 Public Works Authority	34
3.1.5 Traffic Police.....	35
3.1.6 Accredited Practitioner	35
3.1.7 Posted Speed Assessment for Existing Roads	35
3.1.8 New Roads.....	36
3.1.9 Function versus Use of the Road.....	36
3.1.10 Existing Roads.....	37
3.1.11 Safety Countermeasures.....	39
3.1.12 Posted Speed Review Report	39
3.1.13 Signing Posted Speeds.....	40
4 Traffic Calming	41
4.1 General	41
4.2 Relationship between Speed and Injury Severity.....	41

4.3	Objectives	42
4.4	Benefits and Disadvantages of Traffic Calming.....	42
4.4.1	Benefits.....	42
4.4.2	Disadvantages.....	43
4.5	Types of Traffic Calming Measures	43
4.5.1	Vertical Measures.....	43
4.5.2	Horizontal Measures	44
4.5.3	Other Measures.....	44
4.6	General Design Criteria	44
4.7	Vertical Measures	45
4.7.1	Speed Tables.....	45
4.7.2	Speed Humps.....	45
4.7.3	Rumble Devices	46
4.8	Horizontal Measures.....	46
4.8.1	Road Narrowing.....	46
4.8.2	Traffic Splitter Islands/Pedestrian Refuges	46
4.8.3	Gateway Entry Treatments (Physical Measures).....	47
4.9	Design Process	48
4.9.1	Process Overview	48
4.9.2	Step 1 – Identification of Need for Traffic Calming Measures	48
4.9.3	Step 2 – Data Collection and Analysis	49
4.9.4	Step 3 – Preparation of Preliminary Design	50
4.9.5	Step 4 – Consultation	51
4.9.6	Step 5 – Detailed Design.....	52
4.9.7	Step 6 – Construction	52
4.9.8	Step 7 – Monitoring and Evaluation.....	52
4.10	School Zones	53
4.10.1	Speed	54
4.10.2	Components	54
4.10.3	Process.....	56
5	Roadside Clear Zones	59
5.1	General.....	59
5.1.1	New Designs	61
5.1.2	Existing Layouts	61
5.2	Urban and Low Flow Roads	62
5.3	Design Criteria.....	62
5.3.1	Surface Conditions.....	63
5.3.2	Slopes	64
5.3.3	Drainage Channels.....	65
5.3.4	Obstructions	65
5.3.5	Curbs.....	66
5.3.6	Nonmotorized Users.....	66
5.4	Horizontal Curves.....	66

6	Vehicle Restraint Systems.....	71
6.1	General	71
6.1.1	Provision of Vehicle Restraint Systems	71
6.1.2	Reduction of Risk Level Posed by a Safety Concern.....	71
6.1.3	Clear Zone Concept	72
6.2	Longitudinal Safety Barriers and Containment Curbs	73
6.3	Median Safety Barriers and Containment Curbs	73
6.4	Verge Safety Barriers and Containment Curbs	73
6.4.1	Roadside Conditions.....	74
6.4.2	Side Slopes	74
6.4.3	Selection of a Verge Safety Barrier or Containment Curb	76
6.5	Impact Severity Level.....	77
6.6	Deflection Characteristics.....	77
6.7	Safety Barrier Layout	77
6.8	Vehicle Parapets	81
6.8.1	Height of Vehicle Parapets	81
6.8.2	Impact Severity Level	82
6.8.3	Deflection Characteristics	82
6.8.4	Addition Vehicle Parapet Considerations	82
6.9	End Treatments/Terminals	83
6.10	Transitions	85
6.11	Impact Attenuators.....	86
6.12	Additional Vehicle Restraint Systems' Selection Considerations	87
	References	89

Part 24: Road Safety Audits

Acronyms and Abbreviations	iii
1 Introduction	1
1.1 Purpose	1
1.2 Context: The Safe System Approach.....	1
1.3 Scope.....	2
1.4 What are Road Safety Audits	2
2 Road Safety Audit Stages	5
2.1 Overview	5
2.2 Stage 1: Concept Design	5
2.3 Stage 2: Preliminary Design	6
2.4 Stage 3: Detailed Design	6
2.5 Stage 2/3: Combined Preliminary and Detailed Design.....	7
2.6 Stage 4: Construction.....	7
2.7 Stage 5: Post-Construction	8
2.8 Stage 6: Road Safety Review (Existing Road Network)	8
2.9 Other Road Safety Audits.....	9
2.9.1 Interim	9
2.9.2 Thematic.....	9
2.9.3 Work Zones.....	10
2.10 Exemptions	10
3 Road Safety Audits within Projects.....	11
3.1 Types of Projects to be Subjected to Road Safety Audits.....	11
3.2 Hold Points—Through the Design Process	11
3.3 Exemptions	11
4 Road Safety Audit Team.....	13
4.1 Overview	13
4.2 Composition of the Road Safety Audit Team.....	13
4.2.1 Road Safety Audit Team Leader	14
4.2.2 Road Safety Audit Team Member	14
4.2.3 Road Safety Audit Team Observer	14
4.2.4 Specialist Advisors	14
4.2.5 Local Representative	14
4.3 Experience.....	15
4.4 Accreditation.....	15
5 Road Safety Audit Process.....	17
5.1 Overview	17
5.2 Step 1: Project Identification	17
5.3 Step 2: Selection of Road Safety Audit Team	18

5.4	Step 3: Pre–Road Safety Audit Briefing Material.....	18
5.5	Step 4: Desktop Study.....	20
5.6	Step 5: Site Visit	20
5.7	Step 6: Road Safety Audit Debrief	20
5.8	Step 7: Reporting	21
5.9	Step 8: Completion of Decision Tracking Form	21
5.10	Step 9: Audit Closure	22
6	Road Safety Audit Management	23
6.1	Overview	23
6.2	Primary Roles and Responsibilities.....	23
6.2.1	Overseeing Organization.....	23
6.2.2	Design Organization	23
6.2.3	Road Safety Audit Team.....	24
6.3	Management Procedures	24
6.3.1	Overview	24
6.3.2	Submanagement within Organizations.....	24
	Bibliography	25

Part 25: Departures from Standards Process

Acronyms and Abbreviations	iii
1 Introduction	1
1.1 Design Departures	1
1.1.1 What is a Design Departure?	1
1.1.2 Justification for a Departure.....	2
1.1.3 Design Criteria Requiring the Departure Process.....	3
1.1.4 Other Design Parameters	5
1.1.5 Roadside Barriers and Attenuators	5
2 Design Departure Procedures – Determination and Monitoring	7
2.1 Design Departure – Procedures	7
2.1.1 Departures Involving Design Criteria.....	7
2.1.2 Programmatic Departures	7
2.1.3 Departures during Concept Development or Preliminary Engineering	8
2.1.4 Determine Impacts of Meeting Criteria	8
2.1.5 Perform Transportation Risk Assessment	9
2.1.6 Mitigation Measures	10
2.1.7 Risk Assessment and Recommendations	10
2.1.8 Review and Approval of Design Departures.....	11
2.2 Level of Detail Required for Departure Submission	12
2.3 Monitoring Performance	14
2.4 Departures Tracking Form	14
2.5 Determination of a Departure	14
2.6 Retroactive Departures.....	14
3 Design Departures – Mitigation Strategies.....	15
3.1 Bike Lane or Shared-use Path	15
3.2 Design Speed.....	16
3.3 Lane Width.....	16
3.4 Shoulder Width	17
3.5 Bridge Width	17
3.6 Horizontal Alignment.....	17
3.7 Superelevation	18
3.8 Vertical Alignment	18
3.9 Grade.....	18
3.10 Stopping Sight Distance	18
3.11 Cross Slope.....	18
3.12 Vertical Clearance	19
3.13 Lateral Offset to Obstructions	19
3.14 Length of Acceleration and Deceleration Lanes on Freeways and Expressways.....	19
3.15 Structural Capacity.....	20

3.16	References on the Operational and Safety Effects of Roadway Elements.....	20
	References	21
	Bibliography	21
